

ABSTRACT OF THE DISCLOSUREVIDEO AND AUDIO INFORMATION PROCESSING

5 A camera-recorder apparatus comprises an image capture device operable to  
capture a plurality of video images; a storage medium by which the video images are  
stored for later retrieval; a feature extraction unit operable to derive image property  
data from the image content of at least one of the video images substantially in real  
time at the capture of the video images, the image property data being associated with  
10 respective images or groups of images; and a data path by which the camera-recorder  
apparatus is operable to transfer the derived image property data to an external data  
processing apparatus.
